▼ Airplanes + Soda Pop = The Perfect Drink

For those who love airplanes, an aviation-themed soda machine is a fun addition to a home, office or hangar. The machines can be adorned with any aviation company or manufacturer logo, photos of warbirds or vintage aircraft—whatever suits your fancy. In addition to restoring vintage soda machines with the familiar Coke and Pepsi motifs, Denver-based American Soda Machines (ASM) customizes the beverage icons, tapping into America's love affair with these relics. For more than five decades, soda machines have been a fixture of American life. The three primary styles of soda machines are sliders, round tops and square tops. While ASM restores and sells all three of these types, the square tops provide the best "canvas" for customization. The machine can vend either bottles or cans. For more information, call American Soda Machines at (800) 448-6888.
